## Office Policy

Patient's Name: \_\_\_\_\_

Thank you for choosing us as your health care provider. Please understand that payment of your bill is considered part of your treatment. The following statements refer to our office policies, which we require you read, accept, sign and date before any treatment can begin.

- Every new patient is required to fill out forms concerning his/her history and general information prior to being examined.
- Each insurance company or group has specific guidelines that we must follow to warrant payments for our services. As a courtesy to you, we file all claims to your insurance company or group. Please remember that YOU have to contract with the insurance company or group and YOU are ultimately responsible for payment. We cannot accept responsibility for collecting from your insurance company or group, nor negotiating a settlement on a dispute of a claim. If you need assistance with your insurance, please see our office manager, who will readily assist you.
- Our practice is committed to providing the best treatment possible for our patients and we charge what is usual and customary of our area. Please understand that you are responsible for payment in full regardless of an insurance company's arbitrary determination of usual and customary rates.
- Open accounts with no ACCEPTABLE payment activity for 60 days will be considered past due. A billing charge may be assessed to the account balance along with a finance charge of 1.5% per month. You will be responsible for the original past due balance along with these additional charges. ACCEPTABLE payment activity will be determined on an individual basis. Please speak with our office manager to avoid any misunderstandings.
- Open accounts with no ACCEPTABLE payment activity for 120 days will automatically be placed with our collection agency. You will be responsible for payment of the original balance plus any billing charges, finance charges, collection fees and attorney fees assessed to your account.

The adult accompanying a minor is responsible for full payment. The adult (i.e. parent or legal guardian) must be present with the minor and sign the treatment consent form before any services can be administered.

## Informed Consent Form

Every type of health care is associated with some risk of potential problems. Health care providers including chiropractors are required by law to tell you the nature of your condition, the general nature of the treatment, and the risks involved. In keeping with the Louisiana Law of Informed Consent, you are being asked to sign and date this form which confirms our discussion of these matters.

We want to give each patient the best possible care with the least possible risk of complications. To accomplish this, we format treatment plans to suit the distinctive needs of each patient. The following paragraphs describe the most severe risks associated with chiropractic care which are extremely rare in occurrence:

- **STROKE:** Stroke is the most serious problem associated with spinal manipulation. The consequences can be temporary or permanent dysfunction of the brain with very rare complication of death (1 in 20 million). Spinal manipulations have been associated with strokes that arise from the vertebral artery which runs on each side of your neck. This problem occurs so rarely that there is no conclusive data that specifies quantity of probability.
- **DISC HERNIATION AGGRAVATION:** Disc herniations that create pressure on the spinal nerve and/or spinal cord are successfully treated by chiropractors on a daily basis. Chiropractic manipulation can aggravate an existing disc herniation resulting in an increase of symptoms which may last for a few days but seldom for longer periods of time.
- **SOFT TISSUE INJURY:** Soft tissue primarily refers to muscles and ligaments. Muscles move bone, and ligaments limit bone movement. Rarely, chiropractic manipulation can result in minor damage to a particular soft tissue. This may cause a temporary increase in pain and necessary treatments for resolution, but there are no long term effects to the patient.
- **RIB FRACTURES:** The rib cage is found in the thoracic spine or middle back area. Rarely does chiropractic manipulation cause a fracture of a rib to occur. Patients who have weakened bones (Osteopenia or Osteoporosis) have a higher risk of rib fractures because their bones are weaker than normal. We adjust all patients carefully, especially those who have indications of osteoporosis on their X-rays.
- **OTHER POSSIBLE COMPLICATIONS:** There are many other side effects and/or complications that may also rarely occur due to spinal manipulation. These possible complications include, but are not limited to the following: headaches, skin burns, dizziness, radiating pains into the arms and/or legs, exacerbation of pain/problem, soreness, etc.

I hereby authorize any Recovery ChiroMed Practitioner to provide chiropractic treatments including examination/diagnostic, spinal manipulation/adjustments, and various modes of physical therapy that may be deemed necessary or responsible. My treatment plan will be explained to me and I have read and I understand all information set forth in this document, including any attachments. I acknowledge that I will have the opportunity to ask any questions about the contemplated procedure and that my questions will be answered to my satisfaction. This authorization for and consent to chiropractic treatment is and shall remain valid until revoked.

## Billing and Payment

\_\_\_\_\_ **Self-pay:** If you have no available insurance coverage, you will be billed directly for services provided at the time services are rendered.

\_\_\_\_\_ **Health Insurance:** We will bill your health insurance provider if, at the time of service, we are a contracted provider with the insurance company.
